

CHAPTER 10

COMMUNICATION

**EMAILS ARE NOW ONE OF
THE MOST COMMON WAYS
OF COMMUNICATION
BETWEEN PEOPLE**

CHARACTERISTICS , USES AND CONSTRAINTS

LEGISLATION

- It refers to the rules and laws that govern how information is shared and communicated, whether through media, advertising, or other forms of communication.
- These laws ensure that information is accurate, protects people's privacy, and prevents harmful or misleading content from being spread.

ACCEPTABLE LANGUAGE

- Proper use of language while sending emails especially to the companies
- Do not use illegal materials or messages
- Racist, or violent messages
- Use of illegal materials or messages

SECURITY AND PASSWORD PROTECTION

- Using strong password when logging on to your email account
- Change password on regular basis
- Use Spam filters to remove certain suspicious emails
- Running anti-virus

NETIQUETTE

- It is a set of polite rules and guidelines for how to behave and communicate respectfully online.
- It includes being kind in comments, not spamming, and respecting others' privacy.

RULES OF NETIQUETTE

- Do not be abusive online
- Do not send spam
- Be clear and concise with your message
- Always check your spelling and grammar
- Respect people's privacy
- Forgive people's mistake
- Do not use **CAPITAL LETTERS**

RULES OF NETIQUETTE

- Do not plagiarise - acknowledge the owners quote
- Do not use too many emoticons as they might annoy the reader.

QUESTIONS:

It is a short for "internet etiquette," refers to the set of rules and guidelines for polite and respectful behavior when communicating online.

What rules and laws implemented by government with regards to accuracy, protects people's privacy, and prevents harmful or misleading content from being spread?

What are the Rules of Netiquette?

Provide at least 3

EMAIL GROUPS

- known as mailing lists or distribution lists, allow you to send an email to multiple people at once without needing to add each recipient individually

OTHER EMAIL OPERATION

- Carbon copies (CC)
- Blind Carbon Copy (BCC)
- Forward
- Attachments

OTHER EMAIL OPERATION

- **Carbon copies (CC)** - The CC field is used to send a copy of the email to people other than the main recipient(s).
- **Blind Carbon Copy (BCC)** - The BCC field is used to send a copy of the email to additional recipients, but unlike CC, the BCC recipients are hidden.

OTHER EMAIL OPERATION

- **Forward** - is a feature that allows you to send an email you've received to another person.
- **Attachments** - are files or documents that are sent along with the main email message (make sure to send files in a zip).

QUESTIONS:

Aside from email main recipient,
what are the other 4 email
operation?

John sends an email to his colleague, Mark, and includes their manager in the CC field. The manager will see that Mark received the email as well as the fact that it was sent by John.

True or False?

True. When someone is included in the CC field, all recipients of the email can see the email addresses in the CC field. So, if the manager is included in the CC field, Mark will see that the manager received the email as well as that it was sent by John.

John sends an email to his colleague, Mark, and includes their manager in the BCC field. The manager will see that Mark received the email, but Mark will not be aware that the manager received it as well. True or False?

True. When you include someone in the BCC (Blind Carbon Copy) field, the BCC recipient (in this case, the manager) receives the email, but their email address is hidden from all other recipients. Mark would see that he received the email but would not know that the manager was also a recipient.

SPAM

- refers to unwanted or unsolicited messages or email, typically sent in bulk, usually for advertising purposes.

EFFECTIVE USE OF INTERNET

INTERNET AND THE WORLD WIDE WEB

INTERNET

- Internet comes from the Inter Connected Network.
- Something we can touch by the use of network devices

WORLD WIDE WEB

- Only part of Internet which users can access using browser software.
- Consist of massive collection of web pages based on http (hypertext transfer protocol)

INTRANET AND EXTRANET

INTRANET

- Private network (internally a member of the company)
- Safer because it is private less chance of external hacking or viruses

EXTRANET

- Allow intranet to be extended outside the organization.
- But not all information they can access, only specific

EXTRANET

- Allow intranet to be extended outside the organization.
- But not all information they can access, only specific

**BLOGS, WIKIS, SOCIAL
NETWORKING AND
FORUMS**

WEB BLOGS (BLOGS)

- Personal Internet Journal where the writer (blogger) will type in their observation on a topic

MICRO BLOGS (BLOGS)

- are similar to blogs, but are most often used social networking sites to make short, frequent posts. Twitter

WIKIS

- Are web applications or websites that allow user to create and edit their web pages using any browser.

SOCIAL NETWORKING

- It focuses on building online communities of users who share the same interests and activities.

MODERATED FORUM

- Refers to an online discussion forum in which all the post posts are checked by an administrator before they are to be posted.
- There are rules to follow in order to prioritize quality, safety, and rule enforcement, often leading to more structured and respectful discussions.

UNMODERATED FORUM

- Are platforms where user-generated content is posted with little to no oversight. There are no active moderators to enforce rules, or the moderation is minimal.
- Offer more freedom of expression but can result in chaotic, offensive, or harmful content due to the lack of oversight.
